

STEADY ARMS_

Wide range of steady arms

Application

The steady arm allows the contact wire to be offset. It must be light and resistant to line vibrations. Our know-how is reflected in the manufacture of this product through the choice of materials used, the expertise in bending and crimping.

Material

- Galvanized steel
- Aluminium
- Composite

Type

- Straight
- Curved
- Reinforced
- Damped
- Insulated

Adjustable

- Length
- Swivelling head
